**LET US BE VIGILANT**

Of late many instances of our Engineers being charge sheeted even after retirement for the works executed by them while inservice is coming to the news. The Government says there will be no suspension on the last date of service or framing charges. But the fact is cases are dug even afer the retirement citing irregularities. This causes severe mental agony to the Engineers already retired causing financial hardships to them.

Our members must note that we must be ruthless in implementing both quality and quantity without any compromise for the works carried out by them. Only quality work will save us from any punishment. The Hon'ble Minister for Water Resources Department and the Hon'ble Minister for Public Works Department also stressed the importance of quality work. We appeal to our members to be vigilant in this regard.

## GOVERNMENT ORDERS

**TAMIL NADU GOVERNMENT SERVANTS' FAMILY SECURITY FUND SCHEME –**  
Lumpsum amount payable in case of death of Government employees while in service  
– Enhancement from Rs.3,00,000/- to Rs.5,00,000/- Order – Issued.

**Finance (Pension) Department**

**G.O.(Ms)No.197**

**Dated:01.09.2021**

### **ORDER:**

The Tamil Nadu Government Servants' Family Benefit Fund Scheme, subsequently renamed as Tamil Nadu Government Servants' Family Security Fund Scheme was launched with effect from 1.1.1974, as a self insurance scheme without involving Life Insurance Corporation of India to support the family of Government employees including those in temporary and non pensionable service, persons in foreign service and on deputation (menials paid from contingencies) and persons borne on provincialised work-charged establishments and All India Service Officers belonging to Tamil Nadu cadre, who die in harness. The subscriber's contribution under the scheme was initially fixed at Rs.10/- p.m. deducted from the pay bill. The lumpsum amount payable in the case of death of the subscribers while in service was fixed at Rs.10,000/-

2. The monthly contribution and lumpsum amount payable under this scheme were revised from time to time. In the Government Order ninth read above, it was ordered to deduct a sum of Rs.60/- p.m. as subscribers' contribution and to pay a sum of Rs.3,00,000/- as lumpsum amount in the event of death of the Government servant under this scheme with effect from 01.02.2016.

3. The Hon'ble Minister for Finance and Human Resources Management of Tamil Nadu in the **Budget Speech 2021-2022** on **13.08.2021** has announced that, *"the lumpsum grant from the Family Security Fund paid to the family of a Government employee who dies while in service will be enhanced from Rs.3 lakh to Rs.5 lakh. Accordingly, the subscription to the Fund shall be enhanced to Rs.110/- per month. This benefit is also applicable to the employees covered under Group Insurance Scheme"*.

4. Accordingly, the Government issues the following orders: -

- i. The lumpsum amount payable under Tamil Nadu Government Servants' Family Security Fund Scheme shall be enhanced to **Rs.5,00,000/-**
  - ii. The employees contribution under this scheme shall be enhanced to **Rs.110/- p.m.** with effect from **September 2021** and this contribution will continue till the superannuation of the Government employees.
  - iii. The existing rules and other instructions governing the Tamil Nadu Government Servants' Family Security Fund Scheme shall continue.
5. The above Orders shall take effect from 01.09.2021.

**(BY ORDER OF THE GOVERNOR)**

1. G.O.(Ms)No.105, Personnel and Administrative Reforms (FR-III) Department, dated 07.11.2016
2. G.O.(Ms)No.154, Personnel and Administrative Reforms (FR-II) Department, dated 05.12.2017.

**ORDER:**

In the Government order first read above, orders were issued enhancing the Maternity Leave from 180 days to 270 days to married women Government servants, with less than two surviving children, which may be spread over from the pre-confinement rest to post-confinement recuperation, with full pay at the option of the women Government servants. Accordingly, in the Government Order second read above, Rule 101(a) of the Fundamental Rules was also amended.

2. In the revised Budget for the year 2021-2022 presented in the Legislative Assembly on 13<sup>th</sup> August 2021, an announcement has been made by the Hon'ble Minister for Finance and Human Resources Management, for enhancing the period of maternity leave from 9 months to 12 months for women Government employees with less than two surviving children with effect from 01.07.2021.

3. The Government, after careful consideration order that the Maternity Leave admissible to married women Government servants with less than two surviving children, which is 9 months (270) days at present, be enhanced to 12 months (365 days) with effect from 01.07.2021, with full pay, which may be spread over from the pre-confinement rest to post-confinement recuperation, at the option of the married women Government servants. The women Government servants who proceeded on maternity leave prior to 1<sup>st</sup> July 2021 and continue to be on that leave or or after that date shall be eligible for maternity leave for a period not exceeding 365 days in total.

4. Necessary amendments to the Fundamental Rules will be issued, separately.

## Article on Climate Change impact on Rainfall trend and Hydrological safety of Dams in Tamil Nadu

- Er.V.Veeralakshmi, Executive Engineer, PWD, WRD, SPMU, DRIP, Chennai  
(Continued from the Poriyaalar August 2021 issue)

### Irrigation in Tamil Nadu:

Out of 13 million hectares of geographical area, about 7 million hectares of land are under cultivation. Of this, 55 percent is irrigated and the rest is rain-fed/ dry land. The major occupation is agriculture and hence the dependency on irrigation is more in Tamil Nadu. For better water management, Tamil Nadu has been divided into 17 major river basins and 86 reservoirs are the major sources of irrigation along with about 39,000 tanks which are being maintained by the Water Resources Department. These valuable assets of Irrigation are being maintained through various projects for improving its efficiency and structural adequacy thereby ensuring sustainability.

### Dam Rehabilitation And Improvement Project (DRIP)

The main objective of the Dam Rehabilitation and Improvement Project is to improve the safety and operational performance of the dams considered under the project. To ensure the safety of the dam the following, two criteria are to be satisfied. A). the dam should be hydrologically safe and B) it should be structurally safe. The hydrological safety of the dam is ensured by reviewing the hydrology of each dam for the present rainfall scenario and confirmed whether the existing surplus arrangements are sufficient to handle the derived inflow peak.

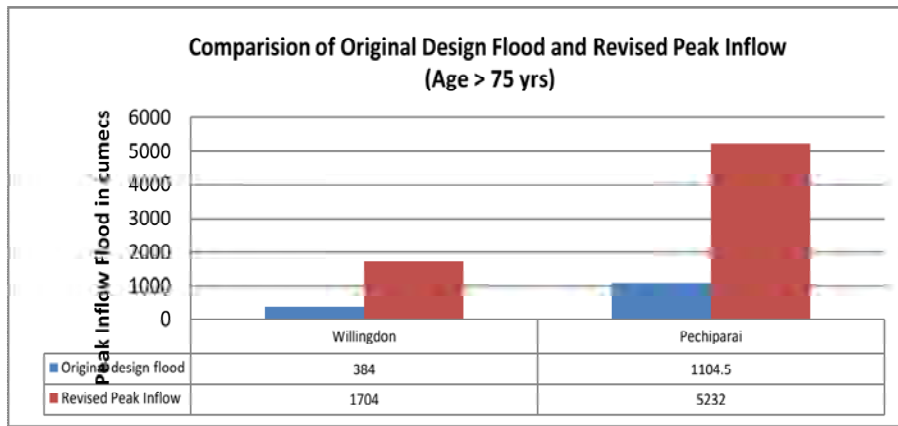

### Hydrological Review Study of DRIP Dams in Tamil Nadu

The hydrology of the selected dams under DRIP were reviewed based on the current rainfall details available in and around the catchment area . The Indian Standard IS : 11223 – 1985 “Guidelines for fixing spillway capacity” gives the criteria for calculating the inflow design flood. The dams are classified based on the capacity and the hydraulic head (from normal or annual average flood level on the downstream to the maximum water level) as given below.

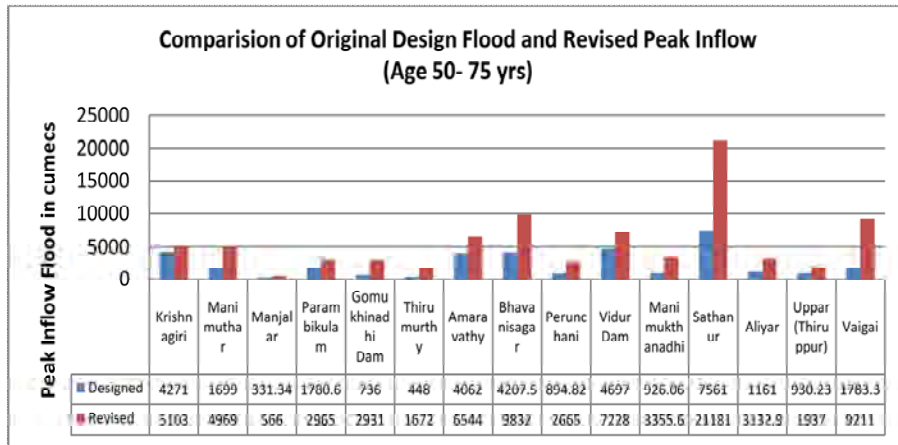

Classification	Gross Storage	Hydraulic Head	Inflow design flood for safety of dam
Small	Between 0.5 & 10 million m <sup>3</sup>	Between 12 m & 30 m	100 Year flood
Intermediate	Between 10 & 60 million m <sup>3</sup>	Between 7.5 m & 12 m	Standard Project Flood (SPF)
Large	Greater than 60 million m <sup>3</sup>	Greater than 30 m	Probable Maximum Precipitation (PMP)

The hydrology of totally 74 Dams was reviewed under DRIP. Nearly 17 Dams are large dam category and 19 dams are small dam category and the remaining dams are intermediate. The hydrological review study was carried out by considering the recent rainfall data available in and around the catchment area and adopting the recommended inflow design flood applicable to the dam as per the IS Code stated above. The revised inflow peak has been derived based on the empirical methods or synthetic unit hydrograph method which is decided based on the catchment size and classification of the dam. The results of the study and the variation with respect to the original design flood are analysed with respect to age of dam.

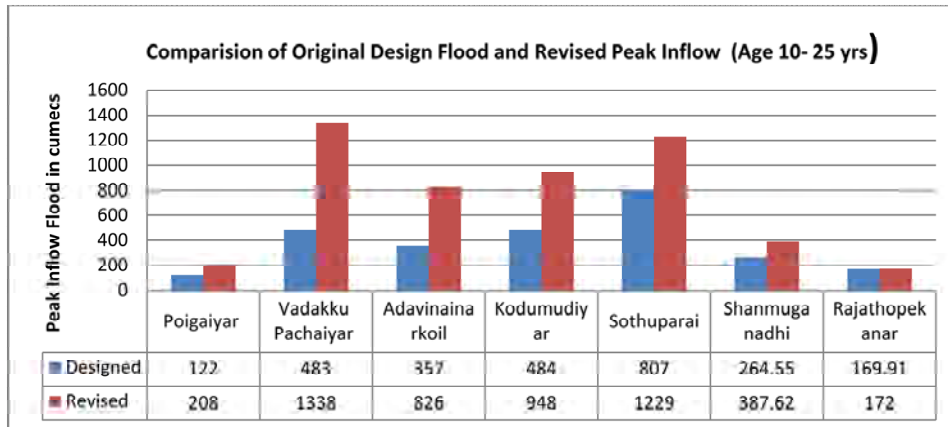

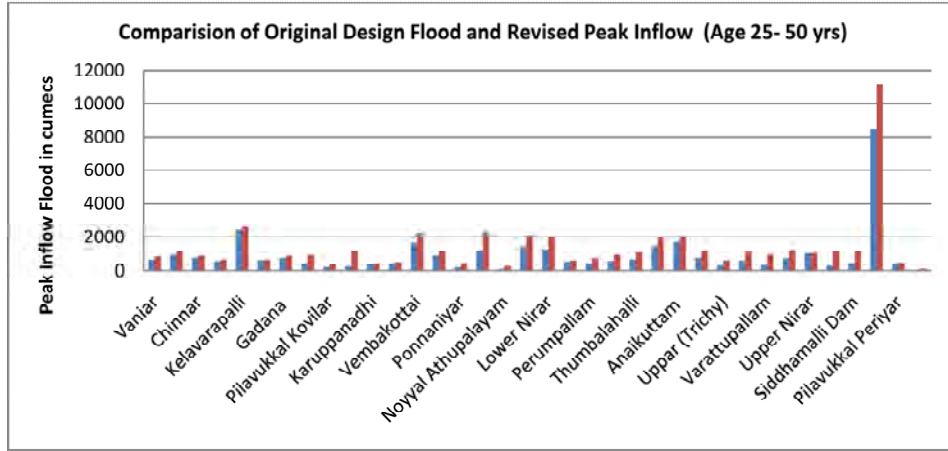

The variation in revised peak inflow with respect to age of Dams is presented graphically:

3.5 times increase in estimated peak inflow as per revised hydrological study.

1.5 times increase in estimated peak inflow as per revised hydrological study.

The above graphs show that the reservoirs having age more than 50 years have a substantial increase in peak inflow as per the present estimation. For the reservoirs with less than 50 years age, the increase in peak inflow is about 80-90 %.

From the rainfall trend and peak inflow arrived at various dams in Tamil Nadu, it is observed that the normal annual rainfall trend shows a decreasing trend, but the peak inflow realizing at various dam sites found to be increasing. This is because the trend of extreme rain events is in increasing trend in north and western slopes of Tamil Nadu and the probability of realizing flash flood is more which is the greatest impact of Climate Change and is of great concern in the future.

### Recommendations of Hydrological Review:

After deriving the inflow peak, the revised flood was routed through the existing surplus arrangements to check the adequacy of the existing surplus arrangements using different reservoir routing techniques such as Modified Puls method and/or channel routing techniques such as Muskingum routing method etc. If the existing arrangements are not sufficient to handle the revised inflow peak, the one or combination of the following structural rehabilitation measures were taken based on the specific requirement of each dam and feasibility at the site.

- Construction of additional spillway arrangement
- Construction of fuse plug arrangement
- Construction/ Modification of U/S Parapet wall
- Strengthening the existing spillway conveyance system

Also, wherever structural risk reduction measures are not possible non- structural measures such as revision in reservoir operation pattern, establishment of flood forecasting arrangements and Emergency preparedness plan have been explored.

### Conclusion:

The design flood review and associated rehabilitation measures taken under DRIP not only improved the hydrologic safety of the dam but also have brought awareness of the necessity of a continued and updated hydrologic risk assessment and management for ensuring safer dams. As an alternate, ecologically sensitive flood mitigation measures could also be explored.

### Selected Quotes of Dr.M.Visvesvaraya

In the preface to Reconstructing India (1920) he says: "The Indian mind needs to be familiarised with the principles of modern progress, a universal impulse for enquiry and enterprise awakened, and earnest thinking and effort promoted. A new type of Indian citizenship purposeful, progressive, and self-respecting should be created and self-reliant nationhood developed."

"In a semi-developed country like ours, we need for the public service every brain that can devise and every hand that can execute measures to foster progress. We should do nothing to discourage effort and action; otherwise the energy and driving power which the country surely needs may dry up and its very source."

"We are to follow in the wake of other countries in the pursuit of material prosperity, we must give up aimless activities and bring our ideals into line with the standards of the West namely, to spread education in all grades, multiply occupations and increase production and wealth. All other activities should conform themselves to the economic ideal."
